

"TOWARDS A NEW HUMAN BEING"

Online Propaedeutic Course

PHONE' Project and Basic Training in Therapeutic Speech Formation and Therapeutic Speech Training for Doctors and Dentists

Dear Interested,

While waiting for the general situation to return to normal, we offer you this online propaedeutic course which counts as internal credit for both courses in case of subsequent enrolment in one of them.

TOWARDS A NEW HUMAN BEING – man is more than his body: knowing this more brings us closer to our inner rudder, which is so important for each of us to know how to steer in these times of crisis.

Untitled, Triptych, detail , Else Marie Henriksen 2010

4 appointments on

THE FOUR-FOULD CONSTITUTION OF THE HUMAN BEING IN THE MOUTH AND IN SPEAKING for truthful, honest and conscious speech.

Each module consists of a Friday evening and a Saturday online course on a specific topic, which will take place with theoretical-practical contributions, artistic exercises, theatre exercises, creative speech and speech therapy exercises in an interactive way and in small groups.

The online mode we will use is very avant-garde and creative. We are in fact comparing ourselves with various international training organizations that are looking for and experimenting with ethical, effective and healthy ways of working online.

In each appointment, a part will be dedicated to the care of a healthy use of language through telephone and online meetings.

Between the modules, practical exercises on the topic of speech therapy, phoniatics and dentosophie will be introduced. These will be accompanied by supervision, in three groups, each followed by the three lecturers in rotation. This supervision will take place in three evening appointments between modules lasting 1.5 to 2 hours.

During these evenings, the exercise carried out by each group will be reviewed and the coordinator and discipline will be changed, with the possibility of moving on to a new exercise.
